Portfolio

SUMMARY

ISTQB certified QA enthusiast with hands-on experience in manual, exploratory, and API testing across web and mobile applications. Proven ability to design large scale test cases, identify critical defects, and improve system reliability. Familiar with test automation using Selenium and Playwright.

SKILLS

QA & Testing

- Manual Testing, Exploratory Testing, Regression Testing
- User Acceptance Testing (UAT)
- Test Case Design & Execution (700+ test cases)
- Bug Reporting & Defect Tracking
- Cross-Browser & Responsive Testing

API & Tools

- API Testing (Postman request validation, response analysis)
- Jira, Git, GitHub
- Chrome DevTools (Network & Console debugging)

Automation

- Selenium WebDriver (Java)
- Selenium Grid (basic usage)
- Playwright

Technical Knowledge

- SQL (MySQL, MongoDB)
- Java, JavaScript

WORK EXPERIENCE

Freelance QA Tester – Upwork

Aug 2023 - Present

- Completed 3 QA projects with positive client feedback across web and mobile applications
- Conducted end-to-end UAT testing for a food delivery platform (similar to Uber Eats), validating full order lifecycle
- Tested OTP-based authentication systems and identified edge-case failures in verification flows
- Performed testing on a game application, identifying UI/UX inconsistencies and functional defects
- Delivered detailed bug reports with reproduction steps, screenshots, and expected vs actual results

QA Tester – TestIO (Crowdtesting Platform)

Sep 2023 - Dec 2024

- Executed manual and exploratory testing on real-world applications across multiple environments
- Identified and reported critical bugs related to usability, functionality, and UI consistency
- Performed cross-browser testing (Chrome, Firefox, Safari) and mobile responsiveness validation
- Used browser developer tools to analyze network requests and console errors
- Conducted regression testing to ensure application stability after updates

PROJECTS

Vehicle Auction System – QA Project

- Designed and executed 742 detailed test cases covering core features (bidding, registration, search)
- Documented defects with structured bug reports including severity, priority, and reproduction steps
- Simulated real-world user scenarios to validate business logic and system reliability
- Maintained test documentation using Google Sheets

UAT Tester – Food Delivery Platform (Upwork Project)

- Performed end-to-end UAT testing for customer and vendor workflows
- Validated order placement, tracking, and notification systems
- Identified edge cases that improved system reliability and user experience

EDUCATION

- | | |
|--|--|
| • Graduate Diploma in Software Engineering
Institute of Software Engineering | • Secondary Education (Grade 6–13)
Nalanda College |
| • QA Foundation Certificate
Informatics Institute of Technology | • Java OOP Certificate
