SUMMARY

ISTQB Certified Tester and Software Engineering Intern with a strong focus on User Acceptance Testing (UAT) and Quality Assurance. Experienced in manual, exploratory, and UI/UX testing to ensure software aligns with business goals and user needs. Skilled at bridging the gap between technical development and user-centric validation.

WORK EXPERIENCE

QA Tester - TestIO

Sep 2023 - Dec 2024

- Executed manual and exploratory testing for diverse web and mobile applications to ensure alignment with user expectations.
- Identified, reported, and validated critical bugs, focusing on functional flows and UI/UX consistency.
- Performed regression testing to ensure new updates did not compromise existing business-critical features.

Freelance QA Tester - Upwork

Aug 2023 - Present

- Performed manual and exploratory testing on web and mobile applications, identifying bugs and UI issues while meeting project requirements.
- Delivered clear bug reports with steps and visuals to support quick issue resolution.

EDUCATION

Graduate Diploma in Software Engineering

Institute of Software Engineering

Feb 2024 - 2026 Feb

Secondary Education (Grade 6–13)

Nalanda College

2013 - 2021

CERTIFICATIONS

- ISTQB Certified Tester - Foundation Level (CTFL)
- Professional Certificate in Software Quality Assurance – Foundation Level - IIT
- Professional Certificate in Java Programming with Object-Oriented - IIT

PROJECTS

UAT Tester | HomeKuk Food Delivery Platform (Upwork)

- Led end-to-end UAT for "Order-to-Delivery" workflows, validating dual-interface (Cook/Customer) usability.
- Identified critical edge cases in tracking and notifications, directly improving UX and delivery reliability.

Vehicle Auction Website (QA Project) – Manual Testing

- Developed and executed detailed test cases to validate core business logic (bidding, user registration, and search).
- Simulated real-world user journeys through functional and UI/UX testing, documenting defects in comprehensive bug reports.

SKILLS

- Testing Core:** User Acceptance Testing (UAT), Manual Testing, Exploratory Testing, Regression Testing, UI/UX Validation, API Testing.
 - Documentation:** Test Case Design, Bug Reporting, Requirement Analysis.
 - Tools:** Jira (Defect Tracking), Postman, GitHub, Git, Figma (UI/UX Prototyping).
 - Databases:** SQL, MongoDB, MySQL
 - Languages & Tech:** Java, Python, JavaScript, TypeScript, SQL, Spring Boot, React.
 - Databases:** MySQL, MongoDB.
-
